CIRCULAR

Date: 12\textsuperscript{th} Dec, 2015

A successful engineer needs to have an analytically mind and keen attitude along with strong grip on their respective technology. To fulfill these requirement students must have a practical knowledge along with the theoretical knowledge. To acquire the practical knowledge students must have to go for vocational industrial training.

It is mandatory for to all the students of 5\textsuperscript{th} semester degree engineering to go for vocational training in industry of minimum two weeks after competition of their GTU Exams. If you wish to do any professional short term courses in your stream then it will be also considered as a part of training.

✓ Ensure that your training should be completed on or before 05\textsuperscript{th} Jan, 2016.
✓ Do not forget to submit report in prescribed format and certificate of training/course.
✓ Prescribed format will be available at your department head.
✓ You are also permitted to have vocation training in groups (3 to 4 students). Only one copy of report is required to submit for groups.
✓ If any company ask for NOC (No Object Certificate), which will be available from your respective department.
